стеке

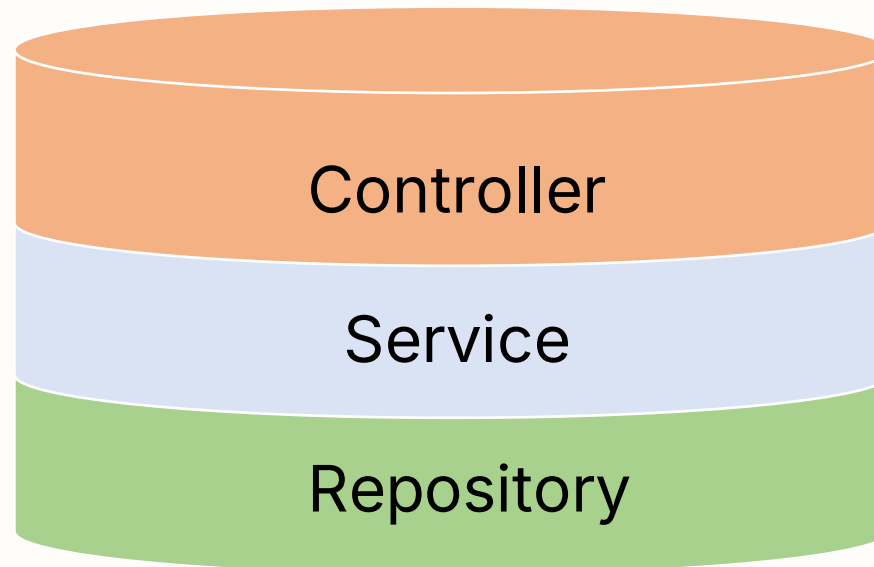

Kotlin

Dart

Архитектура API

- *Использование DTO для изоляции бизнес-логики от API-контрактов*

- Четкое разделение на *Controller* → *Service* → *Repository*

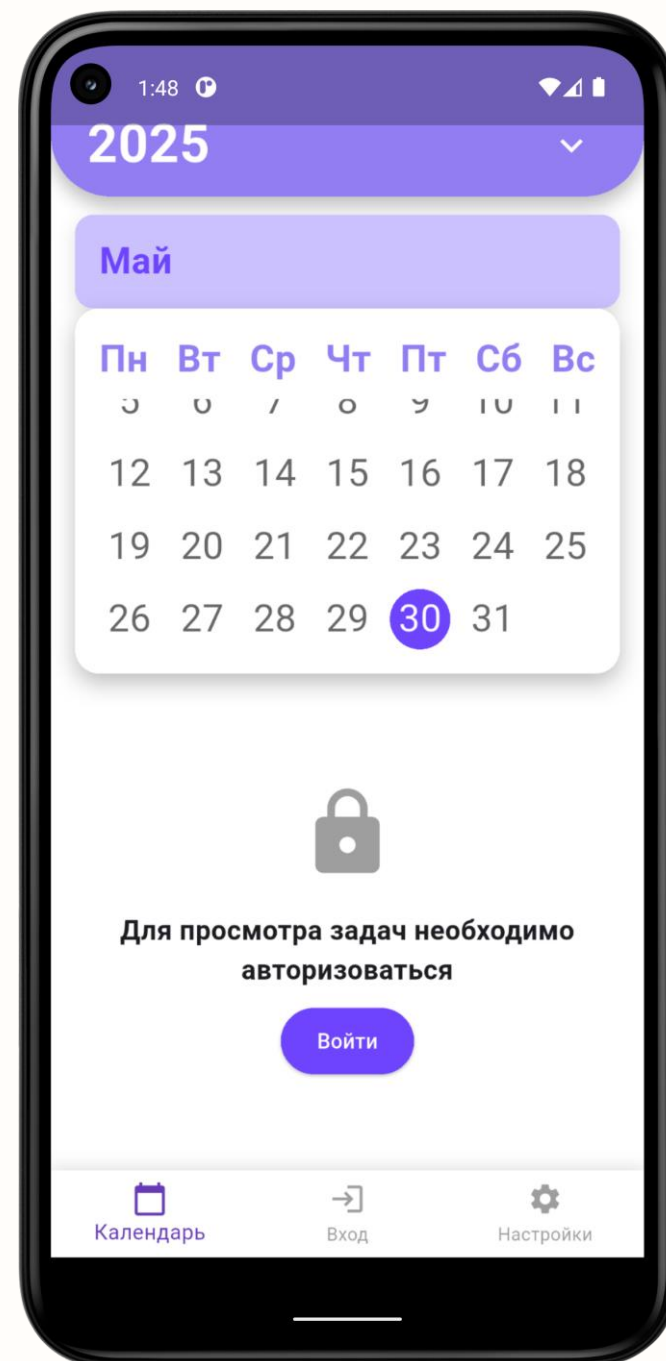

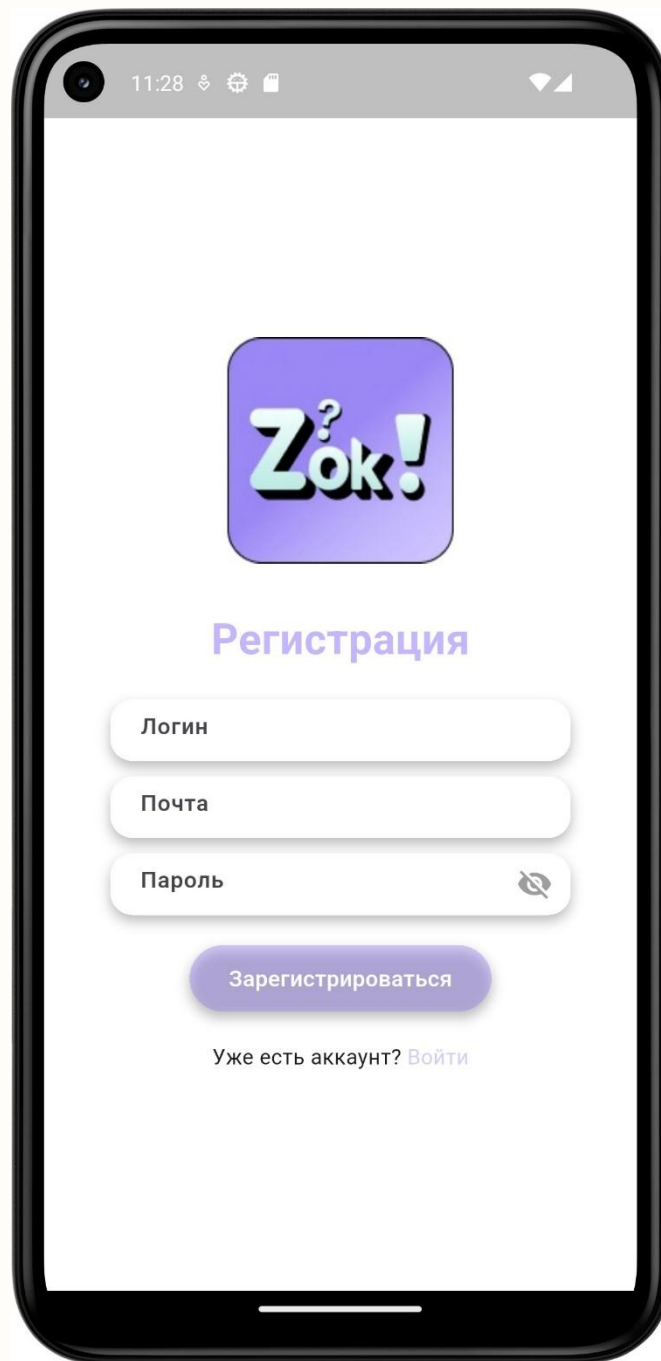

Безопасность

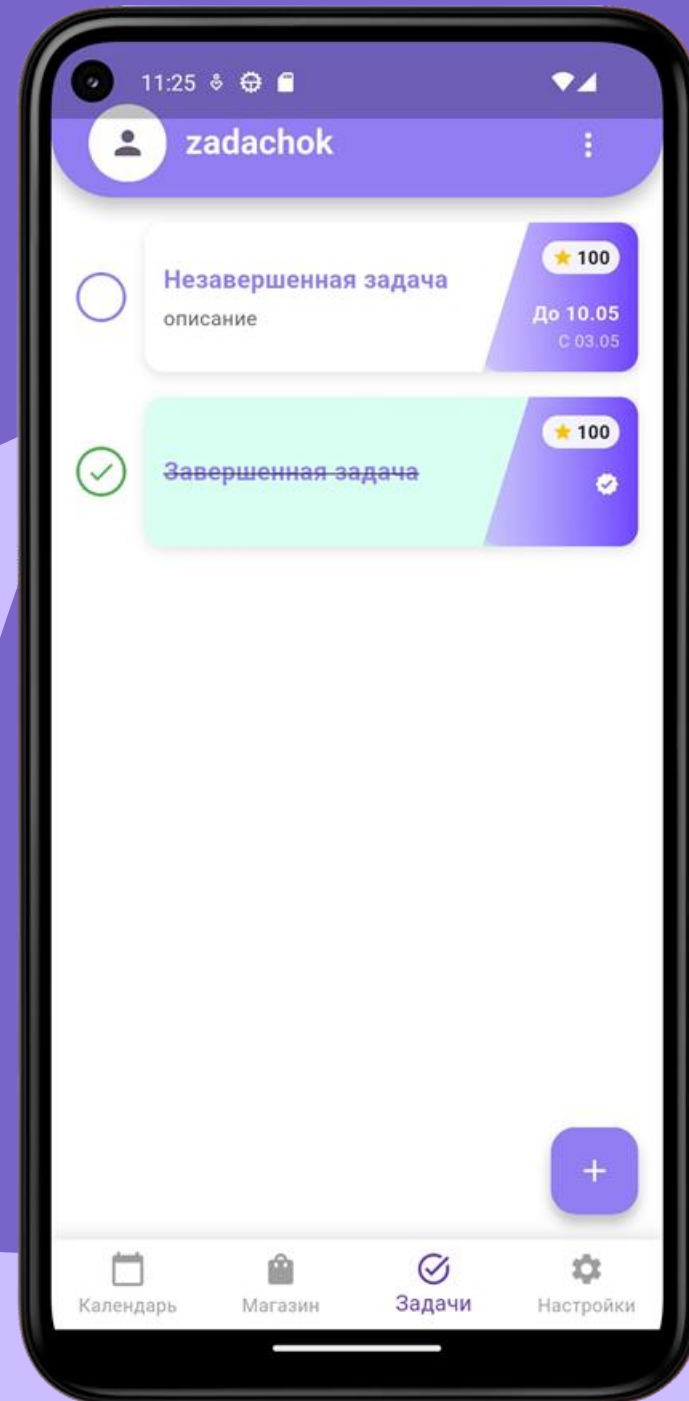

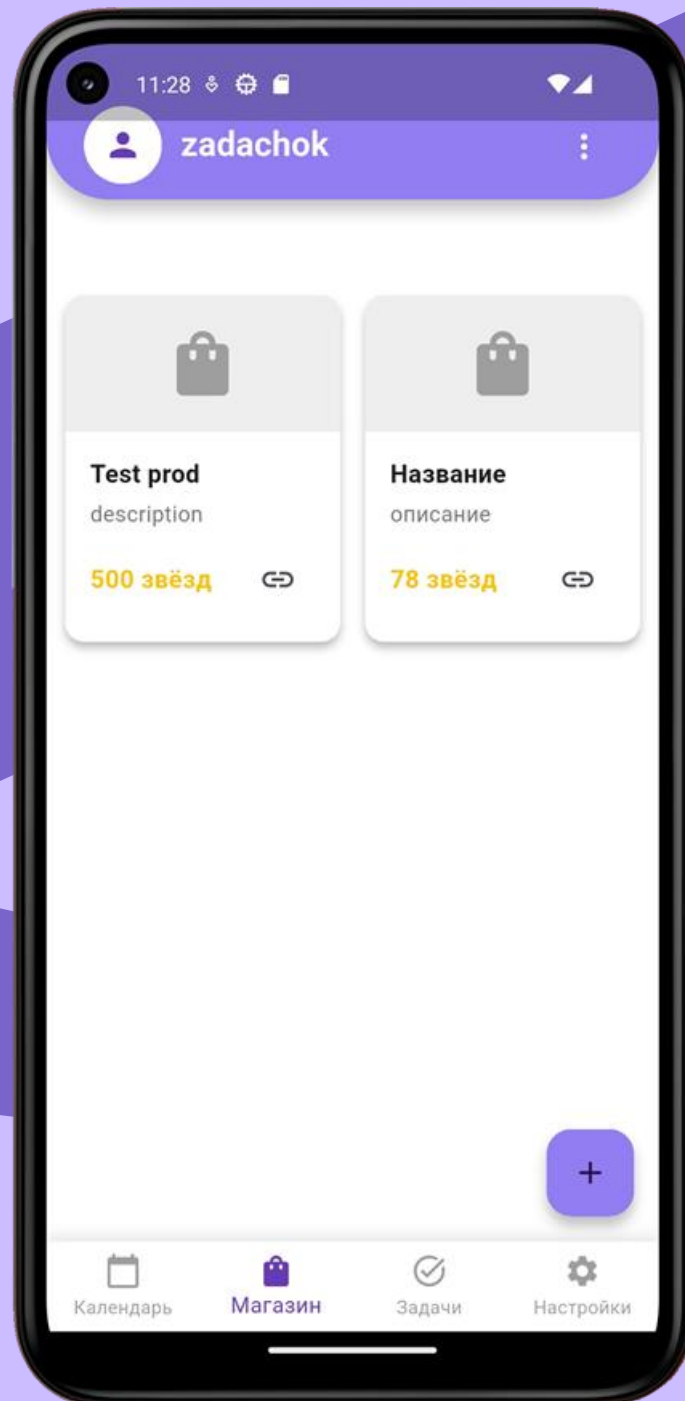

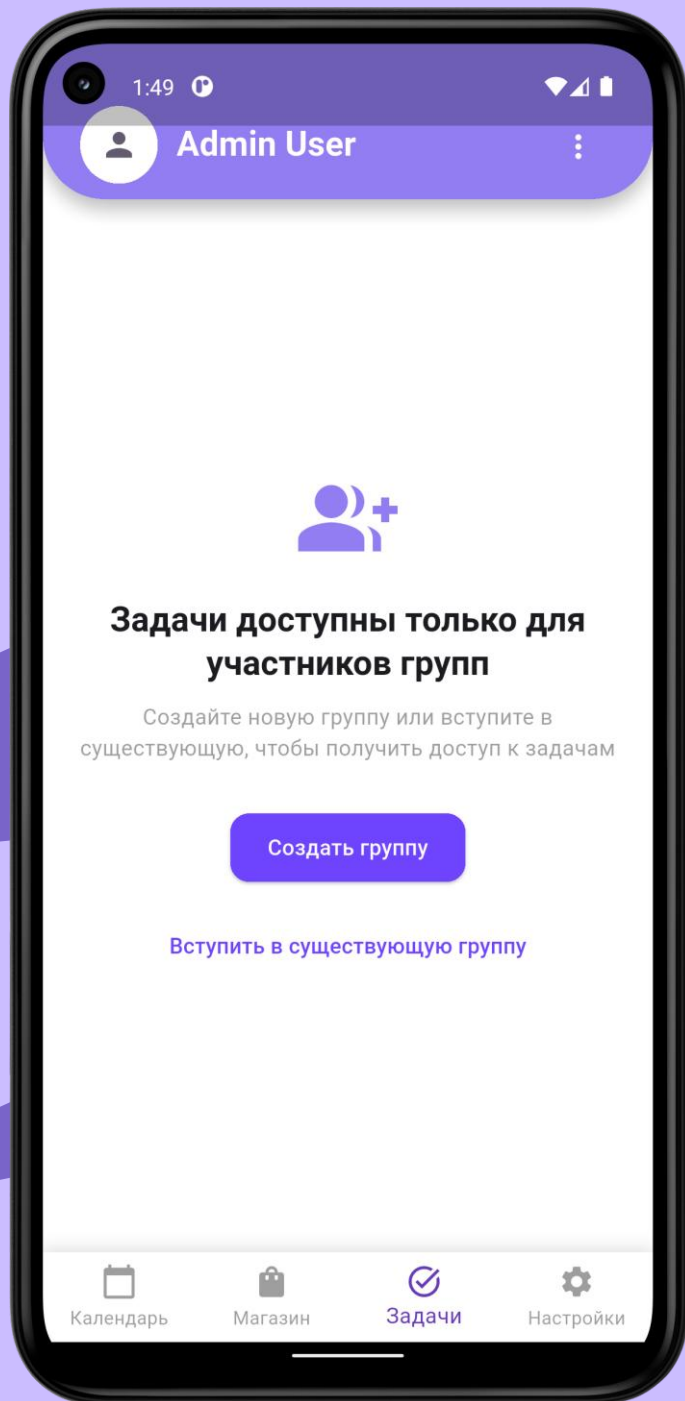

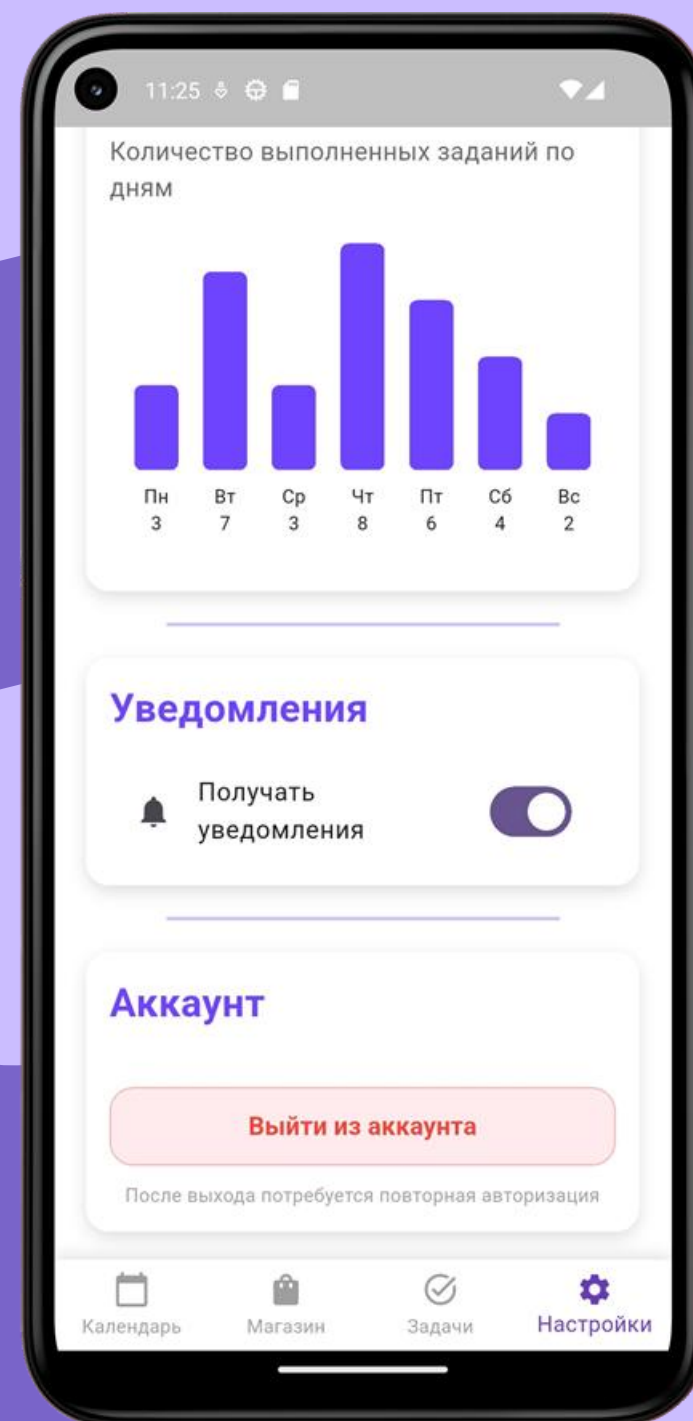

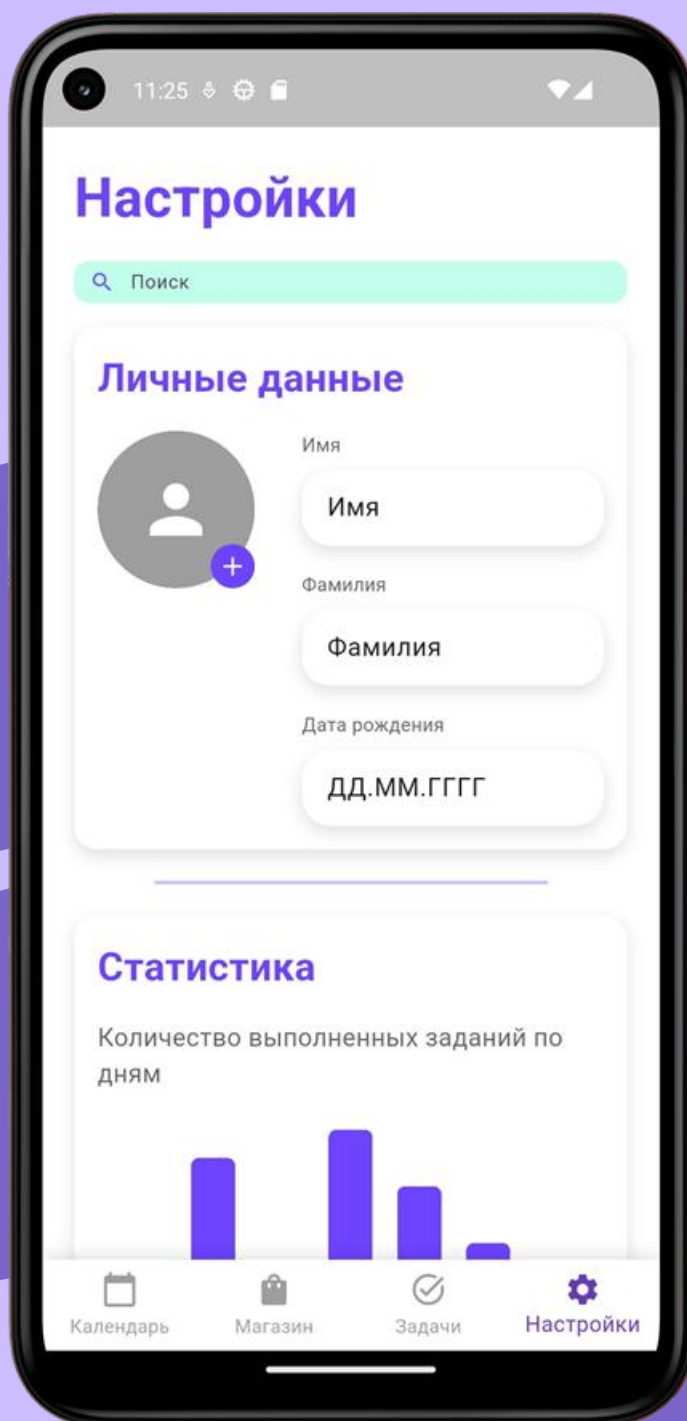

HTTPS

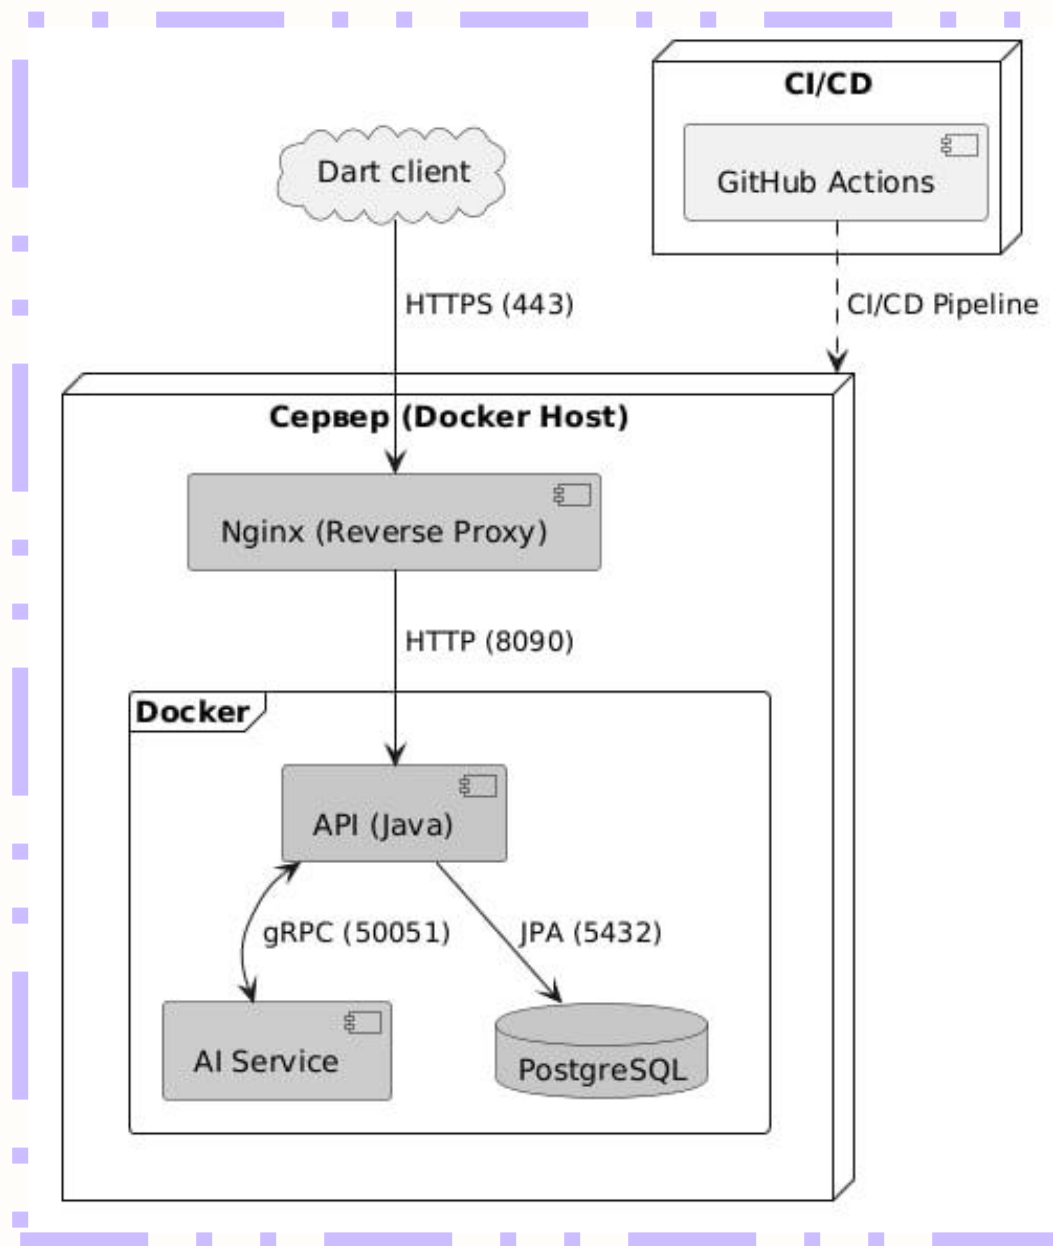

Реализованные функции

Развертывание и DevOps

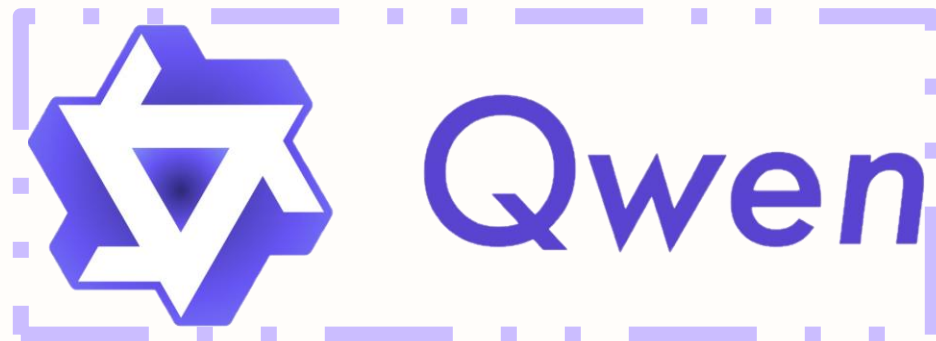

CI/CD

*«Ушло два дня, а
сэкономило две
недели»*

test

succeeded yesterday in 2m 23s

- ✓ Set up job
- ✓ Run actions/checkout@v4
- ✓ Set up Docker
- ✓ Install Docker Compose
- ✓ Check db/init.sql exists
- ✓ Set up JDK
- ✓ Install Dart SDK
- ✓ Build API
- ✓ Start Docker Compose
- ✓ Install Postgres client
- ✓ Wait for Database Health
- ✓ Check Database Initialization
- ✓ Wait for API
- ✓ Run Dart Tests
- ⌚ Show Logs on Failure
- ✓ Cleanup

*Дальнейшие
развитие*

Спасибо за внимание!
